KOMATSU

PC230NHD-8

ENGINE POWER
116 kW / 156 HP @ 2.000 rpm

OPERATING WEIGHT
22,820 - 24,050 kg

BUCKET CAPACITY
max. 1,58 m³

Hydraulic Excavator

PC230NHD-8

ecot3
A unique machine with unrivalled benefits

The PC230NHD-8 is a rugged, productive, all-European machine. Designed and expressly built for European markets, it delivers outstanding productivity, reliability and operator comforts in a robust, environmentally friendly package. Komatsu’s exclusive, on-board, HydraulMind system assists in all operations, providing enhanced machine performance that’s always perfectly matched to the task.

**Revolutionary machine management**
Track and monitor your machine anytime, anywhere for total peace of mind.

**Effective fuel management**

Improved fuel consumption
Through total Komatsu development and control of the engine, hydraulic and electrical systems.
Up to 10% improvement!
HYDRAULIC EXCAVATOR

**Total operator comfort**

Low-noise cab
Operator ear noise is as low as an average passenger car.

Large TFT monitor
Improved operator interface through Komatsu-developed information technology. (TFT: Thin Film Transistor)

**Complete safety**

New, safe SpaceCab™
Tubular design developed specifically for hydraulic excavators to protect the operator in the event of a roll over accident.

**HD undercarriage**
Lateral stability has been improved and the lifting capacity has increased (compared to the PC210-8).

**Protecting the environment**

The Komatsu SAA6D107E-1 engine meets EU Stage IIIA and EPA Tier III emission regulations. 29% NOx reduction.
Wide, spacious cab
The newly designed, wide and spacious cab includes a heated air suspension seat with reclining backrest. The seat height and longitudinal inclination are easily adjusted using a pull-up lever. You can also set the operational posture of the armrest and the position of the console to suit your needs. Reclining the seat further enables you to place it into the fully flat state with the headrest attached.

Low-noise design
The newly designed cab is highly rigid and has excellent sound absorption ability. Thorough improvement of the noise source reduction technology and the use of low-noise engine, hydraulic equipment and air conditioner mean this machine generates very low noise levels, similar to that of a passenger car.

Pressurised cab
An air conditioner and air filter are fitted as standard. Together with a higher internal air pressure (60 Pa), they reduce dust entry into the cab.

Reduced noise levels

**Low operating noise: -2 dB(A) compared to Dash 7**
Reduced noise levels during operation due to low-noise engine and other developments.

- Reduced fan speed (1)
- Large capacity radiator (2)
- Electronically controlled common rail engine (3)
- Multi-staged injection (4)
- Sound insulation cover (5) around low noise muffler (6)
- Optimal arrangement of sound-absorbing materials

Low vibration with cab damper mounting
A multi-layer viscous mount system incorporates a longer stroke and the addition of a spring. The new cab damper mounting combined with a high-rigidity deck reduces vibration at the operator’s seat.
Automatic air conditioner
Joysticks with proportional control button for attachments

Additional working lamps (option)
Hot and cool box

Quick-coupler piping standard
Bottle holder and magazine rack

Large sun roof with integrated sun shade
12 Volt power supply

Outer air filter
Easy removal/installation of the air conditioner filter element, without tools facilitates cleaning.

Radio
New, large TFT monitor

**EMMS (Equipment Management and Monitoring System)**

The EMMS is a highly sophisticated system, controlling and monitoring all the excavator functions. The user interface is highly intuitive and provides the operator with easy access to a huge range of functions and operating information.

**Large multi-lingual TFT monitor**

A large user-friendly color monitor enables safe, accurate and smooth work. Screen visibility is improved through a TFT liquid crystal display that can be easily read at various angles and in various lighting conditions.

- Simple and easy-to-operate switches
- Industry first function keys facilitate multi-function operations
- Displays data in 10 languages to support operators around the world

### On-screen symbols

6. Window washer

### Working mode Application Advantage

<table>
<thead>
<tr>
<th>Working mode</th>
<th>Application</th>
<th>Advantage</th>
</tr>
</thead>
</table>
| P            | Power mode        | • Maximum production/power  
              |                                                | • Fast cycle times                             |
| E            | Economy mode      | • Excellent fuel economy                      |
| B            | Breaker mode      | • Optimum engine RPMs and hydraulic flow       |
| L            | Lifting mode      | • Hydraulic pressure has been increased by 7%  |
| ATT          | Attachment mode   | • Optimum engine RPMs, hydraulic flow, 2 way   |
Monitor function
The controller monitors engine oil level, coolant temperature, battery charge and air clogging, etc. If the controller finds any abnormality, it is displayed on the LCD.

Maintenance function
The monitor indicates when the replacement interval has been reached for the oil and filters.

Fingertip hydraulic pump oil flow adjustment
From the LCD monitor, you can automatically select the optimal hydraulic pump oil flow for breaking, crushing and other operations in the B and ATT modes. In addition, the flow to the attachment is automatically reduced during simultaneous operation with other working equipment. This ensures smooth motion of all working equipment. Hydraulic pump oil flow adjustment for both attachment lines is now possible.
Effective Fuel Management

Working modes
Two established work modes are further improved.
P mode - Power or work priority mode has low fuel consumption, but fast equipment speed, maximum production and power are maintained.
E mode - Economy or fuel priority mode further reduces fuel consumption, but maintains P mode-like working speed for light operations.
You can select Power or Economy modes using a one-touch operation on the monitor panel depending on workload.

Eco-gauge assists energy-saving operations
The Eco-gauge can be seen on the right hand side of the monitor. Working within the green range for environmentally friendly, energy-saving operations reduces CO₂ emissions and fuel consumption.

Idle caution
To prevent unnecessary fuel consumption, an idling caution is displayed on the monitor if the engine idles for 5 minutes or more.

Reliable components
All of the major machine components (such as the engine, hydraulic pump, hydraulic motor and control valves) are designed and manufactured by Komatsu. This guarantees that each component is expressly built for the class and model of machine. This ensures that the engineering, manufacturing standards and testing that go into each component are ‘totally Komatsu’.
The new PC230NHD-8 offers up to 10% fuel savings over Dash 7 machines

With its newly developed Komatsu ECOT3 engine, the PC230NHD-8 significantly reduces hourly fuel consumption through highly efficient techniques for matching the engine and hydraulic unit. It also includes a number of features to promote energy-saving operation such as the variable E mode and Eco-gauge. The Komatsu SAA6D107E-1 engine meets EPA Tier III, and EU Stage IIIA emissions regulations and reduces NOx emissions by 29% compared with Dash 7.

Diesel particulate filter (option)
Removes particulate matter from exhaust emissions. Essential in many urban applications.

Easy end-of-life recycling
The PC230NHD-8 is designed with the consideration of end-of-life recycling, effectively reducing its environmental impact.
- All exterior parts are made of steel.
- Extended engine oil, hydraulic oil and filter replacement intervals reduce environmental impact.
- All plastic parts are given a material code symbol.

Bigger, heavier and sturdy undercarriage structure
The PC230NHD-8 is a unique configuration. It has a bigger and heavier undercarriage than the standard 210NLC-8 specifically designed for jobs in severe duty ground conditions. The PC230NHD-8 has a narrow gauge (shipping width 2.5 m) for easy transport, and is intended for mountainous and other areas requiring an extra strong undercarriage. The revolving frame, centre frame and undercarriage have been designed using the most advanced three-dimensional computer aided design (CAD) and FEM (Finite Elements Modelling) analysis technology.
The Komatsu Tracking System, KOMTRAX™, provides a revolutionary new way to monitor your equipment, anytime, anywhere. It lets you pin-point the precise location of your machines and obtain real-time machine data. Using GPS location and communication satellite technology, it’s designed to be future proof and will meet your demands today and tomorrow.

Komtrax will help you to answer the three most important questions you have about your machine:

• Is the machine making money
• Is the machine safe
• Is the machine in good health

For more details, please ask your distributor for a copy of the Komtrax brochure.

There are certain countries where KOMTRAX™ is not yet available, please contact your distributor when you want to activate the system.

Komtrax will not operate if the satellite signal is blocked or obscured.
New, safe SpaceCab™
Specifically developed for Komatsu excavators, the new cab is designed with a tubular steel frame. The framework provides high durability and impact resistance with very high impact absorbancy. The seat belt keeps the operator in the safety zone of the cab in the event of a roll over.

Rear view camera system standard

Lock lever
Locks the hydraulic pressure to prevent unintentional movement. Neutral start function only allows machine to be started in lock position.

Anti-slip plates
Highly durable anti-slip plates maintain superior traction performance for the long term.

Arm safety valve
(standard)

Thermal and fan guards
Placed around high-temperature parts of the engine. The fan belt and pulleys are well protected.

Large side-view, rear, and sidewise mirrors
Enlarged left-side mirror and addition of rear and side mirror allow the machine to meet the new ISO visibility requirements.

Pump/engine room partition
Prevents hydraulic oil from spraying onto the engine to reduce the risk of fire.

Audible travel alarm

Auto shut-off refuel pump
The new auto shut-off refuel pump prevents fuel spills onto hot or electrical areas, and prevents wasting fuel.
**MAINTENANCE FEATURES**

**Water separator**
This is standard equipment which removes any water that has become mixed with the fuel, preventing fuel system damage.

**Easy access to the engine oil filter and fuel drain valve**
The engine oil filter and fuel drain valve are mounted remotely to improve accessibility.

**Gas-assisted engine hood damper cylinders**
The engine hood can be easily opened and closed with help of the gas-assisted engine hood damper cylinders.

**Side-by-side cooling**
Since the radiator, aftercooler and oil cooler are arranged in parallel, it is easy to clean, remove and install them.

**Washable floor**
The floor is easy to keep clean. The gently inclined surface has a flanged floor mat and drainage holes to facilitate runoff.

**Inclined track frame**
The track frame is sloped so that dirt will not accumulate and can be removed easily.

**Long-life oil filters**
The hydraulic oil filter uses high-performance filtering material for long element replacement intervals, which significantly reduces maintenance costs.

**Flexible warranty**
When you purchase Komatsu equipment, you gain access to a broad range of programmes and services that have been designed to help you get the most from your investment. For example, Komatsu’s Flexible Warranty Programme provides a range of extended warranty options on the machine and its components. These can be chosen to meet your individual needs and activities. This programme is designed to help reduce total operating costs.
**Engine**

Model: Komatsu SAA6D107E-1

Type: Common rail direct injection, water-cooled, emissionised, turbocharged, after-cooled diesel

Engine power
- at rated engine speed: 2,000 rpm
- ISO 14396: 116 kW / 156 HP
- ISO 9249 (net engine power): 110 kW / 148 HP

No. of cylinders: 6

Bore × stroke: 107 × 124 mm

Displacement: 6,69 ltr

Battery: 2 x 12 V/140 Ah

Starter motor: 24 V/5,5 kW

Alternator: 24 V/60 A

Air filter type: Double element type

Monitor panel dust indicator and auto dust evacuator

Cooling: Suction type cooling fan with radiator fly screen

**Swing System**

Type: Axial piston motor driving through planetary double reduction gearbox

Swing lock: Electrically actuated wet multi-disc brake integrated into swing motor

Swing speed: 10 – 12,4 rpm

Swing torque: 68 kNm

Max. pressure: 295 bar

**Swing System**

Steering control: 2 levers with pedals giving full independent control of each track

Drive method: Hydrostatic

Travel operation: Automatic 3-speed selection

Gradeability: 70%, 35°

Max. travel speeds
- Lo / Mi / Hi: 2,6 / 3,6 / 5,4 km/h
- Maximum drawbar pull: 20,570 kg

Brake system: Hydraulically operated discs in each travel motor

**Environment**

Engine emissions: Fully complies with EU Stage IIIA and EPA Tier III exhaust emission regulations

Noise levels
- LWa external: 102 dB(A) (2000/14/EC Stage II)
- LpA operator ear: 69 dB(A) (ISO 6396 dynamic test)

Vibration levels (EN 12096:1997)∗
- Hand/arm: ≤ 2,5 m/s² (uncertainty K = 0,49 m/s²)
- Body: ≤ 0,5 m/s² (uncertainty K = 0,24 m/s²)

* For the purpose of the risk assessment under directive 2002/44/EC, please refer to ISO/TR 25398:2006.

**Operating Weight (APPR.)**

Operating weight including 2,9 m arm, 900 kg bucket, operator, lubricant, coolant, full fuel tank and the standard equipment.

* Load is limited by hydraulic capacity rather than tipping. Ratings are based on SAE Standard No. J1097. Rated loads do not exceed 87% of hydraulic lift capacity or 75% of tipping load.

A – Reach from swing centre
B – Bucket hook height
C – Lifting capacities, including bucket (760 kg), bucket linkage (200 kg) and bucket cylinder (140 kg)

† – Rating over front
‡ – Rating over side
§ – Rating at maximum reach

When removing bucket, linkage or cylinder, lifting capacities can be increased by their respective weights
With 550 mm shoes
### HYDRAULIC EXCAVATOR

#### STANDARD EQUIPMENT

- Komatsu SA6D107E-1, 116 kW turbocharged common rail direct injection diesel engine, EU Stage IIIA compliant
- Double element type air cleaner with dust indicator and auto dust evacuator
- Suction type cooling fan with radiator fly screen
- Automatic fuel line de-aeration
- Automatic engine warm-up system
- Engine overheat prevention system
- Fuel control dial
- Auto-deceleration function
- Engine key stop
- Alternator 24 V/60 A
- Batteries 2 × 12 V/140 Ah
- Starter motor 24 V/5,5 kW
- Electronic closed-centre load sensing (E-CLSS) hydraulic system
- Multi-function video compatible colour monitor with equipment management monitoring system (EMMS) and efficiency guidance
- 5-working mode selection system; Power mode, economy mode, breaker mode, attachment mode and lifting mode
- PowerMax function
- Standard counterweight
- One additional 2-way proportional service valve (full flow)
- Hydrostatic, 3-speed travel system with automatic shift and planetary gear type final drives, and hydraulic travel and parking brakes
- Adjustable PPC wrist control levers with 3 button controls for arm, boom, bucket and swing
- PPC control levers and pedals for steering and travel
- KOMTRAX™ Komatsu Tracking System
- Reinforced safety SpaceCab™;
  - Highly pressurised and tightly sealed hyper viscous mounted cab with tinted safety glass windows,
  - large roof window with sun shade,
  - pull-up type front window with locking device, removable lower window, front window wiper with intermittent feature, sun roller blind, cigarette lighter, ashtray, luggage shelf, floor mat
- Heated air suspension seat with lumbar support, height adjustable arm rests and retractable seat belt
- Automatic climate control system
- Rear view camera system
- 12 Volt power supply
- Beverage holder and magazine rack
- Hot and cool box
- Radio
- Overload warning device
- Electric horn
- Audible travel alarm
- Track roller guards
- Track frame under-guards
- Lockable fuel cap and covers
- Remote greasing for swing circle and pins
- Auto shut-off refuel pump
- Boom safety valves
- Arm safety valve
- Large handrails, rear-view mirrors
- Toolkit and spare parts for first service
- Lights; 2 revolving frame lights and 1 boom light
- Quick-coupler piping
- Engine ignition can be password secured on request
- Standard colour scheme and decals
- Parts book and operator manual
- NHD undercarriage
- 550 mm triple grouser track-shoes

#### OPTIONAL EQUIPMENT

- 1.8 m; 2.4 m; 2.9 m arms
- Mono boom / Two-piece boom
- Additional hydraulic circuits
- Full length track roller guards
- Bucket linkage with lifting eye
- OPG Level II front guard (FOPS)
- OPG Level II top guard (FOPS)
- Service points
- Additional working lamps, including cab roof lights, r.h. boom lamp, counterweight rear lamp and beacon
- Bio oil
- Lower wiper
- Rain visor (not with OPG)
- Komatsu buckets
- Komatsu breakers
- Komatsu quick couplers
- Customised paint
- Automatic greasing system
- Diesel particulate filter
- Further equipment on request
